NOTICE

Consumer Electronics Association (CEA[®]) Standards, Bulletins and other technical publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards, Bulletins and other technical publications shall not in any respect preclude any member or nonmember of CEA from manufacturing or selling products not conforming to such Standards, Bulletins or other technical publications, nor shall the existence of such Standards, Bulletins and other technical publications preclude their voluntary use by those other than CEA members, whether the standard is to be used either domestically or internationally.

Standards, Bulletins and other technical publications are adopted by CEA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, CEA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard, Bulletin or other technical publication.

Note: The user's attention is called to the possibility that compliance with this standard may require use of an invention covered by patent rights.

By publication of this standard, no position is taken with respect to the validity of this claim or of any patent rights in connection therewith. The patent holder has, however, filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license. Details may be obtained from the publisher.

This CEA Standard is considered to have International Standardization implication, but the International Electrotechnical Commission activity has not progressed to the point where a valid comparison between the CEA Standard and the IEC document can be made.

This Standard does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this Standard to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

(Formulated under the cognizance of the CEA R3 Audio Systems Committee.)

FOREWORD

This standard was developed by the Consumer Electronics Association's Audio Systems Committee.

CONTENTS

1 Scope	1
2 References	1
2.1 Normative References	1
2.1.1 Normative Reference List	1
2.1.2 Normative Reference Acquisition	1
2.2 Informative References and Acquisition	2
2.3 Definitions	2
2.4 Symbols and Abbreviations	3
2.5 Compliance Notation	3
3 Standard Test Conditions	3
3.1 Power Supply Requirements	3
3.2 Environmental Conditions	4
3.3 Equipment Preconditioning	4
3.4 Audio Signal Levels	4
3.5 Standard Load Impedance	4
4 REQUIREMENTS – TUNER SECTION	4
4.1 Channel Availability	4
4.2 Channel Selection Methods	4
4.3 Selectivity	5
4.3.1 Measuring system block diagram	5
4.3.2 Measurement method.....	5
4.4 Signal-to-Noise Ratio	6
4.5 Spurious Signal Rejection	6
4.6 Audio Frequency Response	6
4.6.1 Definition	6
4.6.2 Measurement configuration.....	7
4.6.3 Initial Test signal.....	7
4.6.4 Measurement method.....	7
4.6.5 Reporting method	7
4.7 12 dB SINAD Sensitivity	7
4.8 AFSK Trip Sensitivity	7
4.8.1 Test signals	8
4.8.2 Local Oscillator Frequency Stability	8
4.8.3 Test signals	9
4.9 Output Levels and Frequencies	9
4.10 Battery Backup/Low Battery Indication	10
4.11 Antenna Input Connector	11
4.12 External Triggering Capability	11
5 SAME DECODING REQUIREMENTS FOR ALL RECEIVERS	12
5.1 Location Code Response	12
5.1.1 P Test	13
5.1.2 SS Test.....	13
5.1.3 CCC Test.....	13
5.1.4 PSSCCC = 000000 Test	14
5.2 Standardized Multilingual Wording for Event Codes	14
5.3 Event Code Blocking	14
5.4 Originator Code	14
5.5 Proper Event Code Expiration	14
5.6 Decoding Notification	14

5.7 Data/Programming Integrity with Power Loss.....	15
5.8 Status Indicators.....	15
5.9 Voice/Tone Mode Time-Out	15
5.10 Verification of Actual Performance.....	15
6 REQUIREMENTS – RECEIVERS WITH VIDEO DISPLAYS.....	16
6.1 Event, Location and Expiration Time	16
6.2 Multilingual Translations	17
6.3 On-Screen Setup Menus and Text	17
6.4 Visual Alert Indicators.....	17
6.5 Audible Siren and Voice Alarms	17
6.6 Dedicated 'F' Input Connector.....	17
Annex A Your First Annex (Normative)	18

Receiver Performance Specification for Public Alert Receivers

1 Scope

This voluntary standard defines minimum performance criteria for consumer electronic products designed to receive SAME alert signals broadcast by the National Oceanic and Atmospheric Administration's Weather Radio network and Environment Canada's Meteorological Services of Canada Radio network. This standard does not apply to receivers not equipped to receive SAME messages (e.g., tone-alert receivers).

2 References

The following references contain provisions that, through reference in this text, constitute normative provisions of this standard. At the time of publication, the edition indicated was valid. All standards are subject to revision, and parties to agreements based on this standard are encouraged to investigate the possibility of applying the most recent edition of the standard indicated below.

2.1 Normative References

2.1.1 Normative Reference List
